

FAASTeam presents:

How Strong is Your Drink?

Energy drinks have become a multi-billion dollar phenomenon. They are available everywhere and have infiltrated our culture and business world almost as deep as coffee. The big question is: "is it safe to drink these and fly?" We will look in-depth at the history of stimulants and flight in military and general aviation, pertinent FAA regulations, predominate medical opinion and testing, how stimulants affect fatigue cycles and flight safety, as well as how to apply this knowledge to personal aviation risk management and aeronautical decision making.

Directions: Exit I-35 on E. Crest Dr. and turn right (Northeast).

Travel Northeast on E. Crest Dr. 1.3 miles to Airline Dr.

Turn right (Southeast) onto Airline Dr. and travel 0.6 miles to 7th St.

Turn left on 7th St.

The seminar will be held at the James T. Connally Aerospace building. We will have signs in the building directing you to the classroom to be used. Upon entering the Aerospace Center at the main street entrance, turn left and go down the hallway to find the classrooms.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
